PAPER PRESENTATION

" Paper presentation is a formal way to share research findings with an audience. The presenter summarizes key aspects of their work, including the research question, methods, results, and implications, often using visual aids like slides to enhance understanding. The goal is to engage the audience, stimulate discussion, and foster collaboration within the academic or professional community."

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - NO LIMIT

■ GENERAL RULES

1. The Team interested in participating "Paper Presentation" have to decide the Track on which they are going to present given by the respective departments.
2. The Team interested in participating "Paper Presentation" should send the email with subject trackname_departmentname, with an attachment of the paper being presented after completing.
3. The mail must be sent to the given email IDs (which will be published shortly).
4. The mail with submissions should contain:
 - a. Title-Track of the paper-
 - b. Names of the authors-
 - c. Phone no of the authors-
 - d. E-mail ID's-
5. Paper must contain following Titles mandatory – Abstract Index, List of figures, List of tables, Abstract, Introduction, materials and, Results, Conclusion and References.
6. All participants are advised to bring their PowerPoint presentations on a pen-drive.

7. Paper should be in IEEE Format as given on the IEEE site (search for the format in IEEE Site download format /visit site).

8. Font Size - 12.

9. Font style - Times new Roman.

10. Single column Representation.

11. This Avalanche event encourages genuine, authentic and quality research work which is entirely one's own and free from plagiarism. Depending on the context and the references used as a supporting material for the individual's analysis, may be up to a maximum of 50% similarity or plagiarism considered as acceptable.

12. The decision of judges shall be Final and No Appeal or arguments considered / entertained towards the matter.

13. Dress Code relaxed. Make sure to wear your college ID without fail.

14. Be prepared for Technical Issues: herewith we recommend all Teams to keep a back-up of all concerned stuff on a portable media like pen-drive.

15. The Similar format will shortly be shared in WhatsApp group when you Register and join.

16. Interdepartment participation is allowed (Students from any dept can participate in any other dept tracks too)

Details of the round:

A Team gets overall 10 minutes session that includes 8 minutes for presentation, followed by 2 minutes interactions that consisting question and answer.

(Participants are strongly advised to adhere for the presentation time allotted, where in going over time is discouraged, that results in disrupting the schedule)

For more details:

Susheel K - 7899332593

ROBO MANIA

" Step into the thrilling world of robotics with Robo Mania! This high-energy event challenges students to build Wired Robots designed for speed and precision, then race them head-to-head on custom-designed tracks. Participants will put their engineering skills to the test, navigating twists, turns, and obstacles, as their robots race against the clock. With every second counting, the fastest and most efficient robots will rise to the top, as winners are determined by the shortest completion time. Prepare for a pulse-pounding competition where innovation meets adrenaline!"

TEAM SIZE - 4

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 30 TEAMS

ROBOT SPECIFICATIONS:

1. TYPE: WIRED ROBOTS
2. BATTERY: 12V Li-Po BATTERY
3. RPM: 200 TO 500 RPM
4. WEIGHT: 2 TO 3KG
5. MOTORS: BO MOTORS, ROBO MOTORS, JOHNSON MOTORS
6. SIZE: 30*30CM

■ GENERAL RULES

1. Robot should be as per the given specifications. The robot will be weighed, and examined considering all the above specifications before the conduction of the event.
2. Each team can have maximum four members (any department).
3. The robot should not damage the arena. No test practice will be allowed on the arena.

4. The robot must not leave behind any of its parts during the run; else it will result in disqualification.
5. Unethical behaviour could lead to disqualification. Faculty co-ordinators have all the rights to take final decision for any matter during the event.
6. Judge's decision will be considered final. Co-ordination committee reserves the right to add or update any rule.

GAME RULES:

- The competition is based on time trail system.
- The top five team from round 1 will make it to the final round on basis of time (the conduction of the final round depends on the number of participants in the first round).
- The final round (if conducted) will be a surprise round!
- Wires should remain slack during the course of the run. Pulling the wire to aid the robot in traversing may lead to disqualification.
- If any of the robots starts off before start up call, the counter would be restarted and the machines will get a second chance. If repeated again then team will be disqualified.
- Your robot must be ready when call is made for your team.
- Team members will be allowed only three times to touch or reset their robots position during the run. However, this will lead to a time penalty (5s) and timer will not stop during this course of action.
- The robot will be judged on basis of (in priority)
 - a. Time to complete the track.
 - b. Number of checkpoints cleared.
- Machine must not contain any readymade kits, pneumatic & hydraulic systems, IC engines.

For more details:

Ramya Bailkeri - 6362675207

HACKATHON

" The hackathon is jointly hosted by pairs of departments (e.g., CSE & IS, EC & EEE, Civil & Aero)."

TEAM SIZE - 4

MIN. TEAM SIZE - 4

MAX. REGISTRATION - 20 TEAMS

PER PAIRED DEPARTMENTS

■ GENERAL RULES

1. Teams can consist of participants from any (paired departments)
2. Each team can have a maximum of 4 participants.
3. Participants should bring their own laptops, chargers, and necessary software/tools.
4. Tracks for the hackathon will be announced prior to the event, with details provided closer to the date.
5. Teams must submit their final code and presentation by the specified deadline.
6. Judging criteria include creativity, technical feasibility, impact, and presentation quality.
7. Plagiarism or rule violations will lead to disqualification.
8. Teams are expected to adhere to the code of conduct and respect all event timings.

For more details:

Nameet Karadi - 82173 86446

TECHNICAL DEBATE

" A debate is an organized argument or contest of ideas in which the participants discuss a topic from two opposing sides. Witness dynamic exchanges, sharpen your understanding, and be part of an interactive experience that sparks innovation and insight."

TEAM SIZE - 1

MIN. TEAM SIZE - 1

MAX. REGISTRATION - NO LIMIT

■ GENERAL RULES

1. Opening Statements: Each side presents its primary position concisely. Limit to 3-5 minutes per participant.

Presentation of Evidence: Participants should provide data, sources, or references to back their claims.

Counterarguments: Each side is allowed to present rebuttals to the initial claims and evidence (1-3 minutes).

Questioning: Each participant can ask clarifying questions and respond to queries.

Closing Statements: Both sides sum up their arguments, focusing on the most critical points.

2. Rules of Conduct

Respect: All participants should respect each other's opinions, even if they disagree and No Personal Attacks .

Stay on Topic: Keep discussions relevant to the technical issue. Avoid veering off into unrelated topics and listen actively.

3. Evidence and Sources

Reliability: Use only credible sources (peer-reviewed journals, industry standards, etc.).

Transparency: Clearly mention sources and methodologies used for data.

Accuracy: Avoid misrepresenting data or quoting out of context.

4. Time Management

Time Limits: Stick to time limits assigned for each segment. (e.g., 3-5 minutes for initial arguments, 1-3 minutes for rebuttals).

Moderation: A neutral moderator should keep time and manage interruptions.

5. Logic and Argumentation

Logical Consistency: Avoid logical fallacies (e.g., ad hominem, straw man arguments, false dilemmas). And avoid Over generalization."

Shivani K U - 9731741220

TECHNICAL QUIZ

" Get ready for the ultimate test of your tech knowledge at the Avalanche 2024 Technical Quiz! A fast-paced challenge where only the sharpest minds will rise to the top. Whether you're a coding expert, a gadget guru, or a tech enthusiast, this quiz will push your limits and keep you on your toes. Compete against the best, answer thought-provoking questions, and showcase your expertise in a fun, competitive environment. It's time to prove that you have what it takes to be the Quiz Champion of Avalanche 2024!."

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 50 TEAMS

■ GENERAL RULES

1. The quiz will be based on technical domain.
2. The prelims will be held in a standard pen and paper format.
3. The teams with highest scores will be advancing to the finals.
4. Finals will be held in proper quizzing format in multiple interactive rounds.
5. Any use of electronic devices is prohibited and if found doing so it will lead to disqualification.
6. The quizmaster's decision will be final and binding.
7. The organizing team reserves rights to make changes to the event.
8. Any discrepancies after the event will not be entertained.

For more details:

Roman Belgundi - 9741424914

AEROQUEST (PUZZLE CHALLENGE)

" In this thrilling aviation-themed challenge, teams will follow a series of clues to locate and collect the dimensions of various parts. Each clue leads to the next, and teams will use these dimensions to build a model at the finish line using the provided materials. The key to success? Quick thinking, teamwork, and precision!"

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 30

■ GENERAL RULES

1. Participants must register in teams of two, with each participant allowed to join only one team.
2. The number of rounds will be determined by the organizers and announced at the start of the event.
3. Teams must follow clues to locate and record part dimensions.
4. All recorded dimensions must be securely stored and used to construct the model at the designated finish area.
5. Any form of cheating or tampering with the dimensions or materials will lead to disqualification.
6. The judges' decision is final.
7. Organizers reserve the right to modify the rules at any time.

Aital Shaikh - 9035195535

Basira Peerzade - 6364306818

Mallikarjun Chinagundi - 9663169131

AIRCRAASH INVESTIGATION

" In this event, the participants will be given with a crash scenario of an aircraft where they need to find the cause of the crash and steps to be taken to avoid such incidence. All the teams must come up with a power point presentation to showcase the cause and their prevention."

TEAM SIZE - 3

MIN. TEAM SIZE - 1

MAX. REGISTRATION - 30

■ GENERAL RULES

1. Participants can join individually or in team of 3 members.
2. The number of rounds will be decided by organiser and communicated at the start of the event.
3. Teams will be shortlisted based on their quiz results. (Quiz is based on the problem statement).
4. Teams should be present in the allotted class 30min prior the start of the event.
5. Using Internet and AI tools is strictly Prohibited.
6. Results will be concluded based on their presentations.
7. Any form of cheating or tampering with the parts will lead to disqualification.
8. The judges' decision is final.
9. Organizers reserve the right to modify the rules at any time.

Prerona Desai - 9972072704

URBAN LENS

" In this event, participants have to submit an unedited photo clicked by themselves related to the topic. Both Hard copy and Soft copy after registration."

TEAM SIZE - 1

MIN. TEAM SIZE - 1

MAX. REGISTRATION - 30

■ GENERAL RULES

1. All entries should adhere to this theme Mentioned -"Capture the dynamic energy of bustling streets and diverse streetscapes through your lens. Explore the intersection of vibrant Street life, urbanization, architectural design, showcasing how these elements coexist and shape the modern landscape."

2. Eligibility: Open to only ARCHITECTURE DEPARTMENT STUDENTS OF ALL SEMESTERS.

3. Submission Deadline: submission to be given from 19 November, Submission deadline (Both Hard copy & Soft copy) will be mentioned in the google form floated in the whatsapp groups, After registration. Late entries are not accepted.

To check the originality of the submission mail it to rrpai@git.edu

4. Entry Limit: Only one entry per participant.

5. Photo Format: Template types: Free template. JPEG/ PDF FORMAT ONLY

Template categories: LANDSCAPE OR PORTRAIT.

Template dimensions: 29.7 cm x 42 cm (A3 size).

The name of the participant to be written on rear end / backside of the Hard copy submission.

6. Originality: Require that all entries be original works taken by the participants. Plagiarism or copyright infringement is not allowed.

7. Editing Guidelines: Editing Or applying any filters are not allowed.

8. Image Size: A3 size (portrait).

9. Notification of Winners: Winners will be announced and notified on 23 November 2024.

All the participants will be awarded a Certificate of Appreciation for participation.

10. Exhibition and Display- The participants and the winner's photos will be displayed and exhibited in the department of Architecture on and from 23 November 2024.

11. Disqualification: If found plagiarised and edited, the participant will be disqualified.

12. Code of Conduct: Encourage respectful and ethical behaviour among participants.

QUIZZY BRANIACS

" The Architectural Quiz is a team-based competition where each team consists of two members. Participants will engage in a challenging series of questions focused on various aspects of architecture, including Architectural Styles, Indian and International Architecture, Materials, Technology, and related fields and arts."

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 16 TEAMS

■ GENERAL RULES

1. Only team entries are allowed and each team shall consist of two persons.
2. The decision of the quiz-master will be final and will not be subjected to any change.
3. The participants shall not be allowed to use mobile or other electronic instruments during the final round of the quiz.
4. The questions will be on various themes such as: Architectural Styles, Indian Architecture, International Architecture, Books, Materials, Technology and so on RELATABLE TO THE FIELD & ART OF ARCHITECTURE.
5. The questions shall be in the form of multiple choice, true/false statement, specific answer question etc.
6. Audience/Supporters shall not give any hints or clues to the competitors.
7. Replacement of any participant of a team is not allowed after registration.

Rounds

Preliminary round

Elimination round.

Final round or stage round.

A) PRELIMINARY ROUND:

Time limit: 10 minutes.

Each question will carry 1 mark.

Only top 8 teams will be selected for second round.

B) ELIMINATION ROUND:

Each team will be given a set of question paper multiple choice objective type questions.

Time limit: 10 minutes.

Each question will carry 1 mark.

Only top 4 teams will be selected for final round. The selected teams shall have to appear for the final round.

C) THE FINAL ROUND WILL BE COMPRISED OF FOUR ROUNDS:

General Round, Visual Round , Rapid fire round and Stage Round

The following rules will be applied for the final round-

10 marks will be awarded for correct answer.

Response time for each question is 30 seconds.

Team discussion is allowed.

In case of tie between 2 or more teams, further 5 questions will be asked for final selection.

BRAIN BONDING

" Are you ready to dive deep into the legacy of Nobel laureates and their revolutionary discoveries?

Join us for a chemistry showdown where your memory, quick thinking, and problem-solving skills will be put to the ultimate test! Brain Bonding isn't just any quiz—it's a journey through the achievements of great chemists, testing your mettle in the world they helped shape.

Objective:

This quiz is crafted to challenge participants beyond standard questions, bringing Nobel-winning discoveries to life through interactive rounds. Perfect for those with a passion for chemistry, this competition is the ultimate platform to show you've got the "elements" of success!"

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 50 TEAMS

■ GENERAL RULES

1. Round Format: Expect a mix of multiple-choice questions, visual clues, and buzzer rounds.
2. Scoring: Based on speed, accuracy, and problem-solving skills, with points awarded for honoring the legacies of Nobel laureates.
3. Schedule: Rounds 1 and 2 will take place on Day 1, with the final Lab Escape round on Day 2.

Rounds

Elimination Round 1:

- Quickfire Elements: A rapid-fire round celebrating Mendeleev and the periodic table, where speed and recall are key.

- Compound Conundrums: Solve the mysteries of complex Nobel-recognized compounds under time pressure.

Final Round 2:

- Reaction Riddles: Crack clues and equations inspired by Nobel-winning reactions and landmark discoveries.
- Chemistry in Real Life: Analyze scenarios inspired by groundbreaking chemistry in real-world applications.

Prepare to channel the brilliance of chemistry's Nobel laureates as you battle through rounds that echo their monumental discoveries!

STICK STRUCTURE

" The Stick Structure event is an exciting, hands-on event where participants get to explore the world of engineering, creativity, and teamwork by building structures using nothing more than simple sticks and glue. This engaging competition encourages participants to design and construct the most innovative, stable, and efficient bridges, testing their skills in structural integrity and design principles.

Throughout the event, teams will face various challenges, from weight-bearing tests to structural stability evaluations. The goal is to push the boundaries of imagination and problem-solving while fostering collaboration and learning. Whether you're an aspiring engineer, a design enthusiast, or someone who enjoys a fun challenge, the Stick Structure event offers a unique opportunity to showcase your skills in a dynamic, competitive setting."

TEAM SIZE - 3

MIN. TEAM SIZE - 3

MAX. REGISTRATION - 50 TEAMS

■ GENERAL RULES

1. Each team should consist of maximum 3 members. Participants will be provided with required materials.
2. Maximum of 200 sticks can be used.
3. Participants need to prepare a bridge of span of minimum 24cm and maximum span of 30 cm.
4. The stick can be altered by cutting or notching at any end.
5. Model will be loaded till failure. Load will be applied at the center of span.
6. The structure will be tested after 24 hours of drying.

7. Participants are not allowed to bring any external material to improve the strength of the model, any participant seen using that will be disqualified.
8. Participants have to complete their design model within assigned period of time.
9. Screening test will be conducted based on the number of teams participating.
10. Maximum 10 teams will be selected for the conduction of experiment based on the screening test results.
11. This competition is open for all students of Civil Engineering and Architecture.

Judging Criteria:

1. Creativity
2. Accuracy
3. Minimum Weight of the model
4. Maximum load carrying capacity/strength
5. Stability
6. Aesthetic View.

EXPERIMENTAL DESIGN

" The Experimental Design event is a hands-on, immersive experience where participants will conduct experiments focused on testing and analyzing water quality. All the students of Civil Engineering can Participate."

TEAM SIZE - 3

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 30 TEAMS

■ GENERAL RULES

Rounds

FIRST ROUND

1. A team shall comprise of maximum 3 participants.
2. This is a screening round with objective type questions (MCQ & Fill in the blanks types)
3. Test will consists of 30 questions carrying one mark each
4. There is no negative marking
5. Questions with '*' mark will be given priority in case of tie
6. Duration: 35 minutes
7. Top 10 teams will qualify for the Final Round
8. In case of number of teams less than 10, the marks of both First Round and Final Round will be added for judgment
9. Decision of the judges will be final
10. Student details are to be compulsorily filled

FINAL ROUND

1. Portability of given water sample is to be reported
2. Instrument based parameters are not allowed

3. Titration procedure and chemicals required for various parameters will be provided
4. Duration: 60 minutes
5. Team can choose any relevant parameter for reporting
6. Burette readings and color change for each parameter is to be reported to the coordinators
7. Calculations for each parameter tested is to be shown
8. Number of parameters and accuracy of reporting will be considered for judging

Yuvraj G. D – 9008263038

VIRTUAL HUNT

" Virtual Hunt is an engaging event designed to test participants technical knowledge and problem-solving abilities through a series of unique challenges. Teams will compete across multiple rounds with each round eliminating lower-performing teams leaving only the best to advance to the final treasure hunt."

TEAM SIZE - 4

MIN. TEAM SIZE - 3

MAX. REGISTRATION - 100 TEAMS

■ GENERAL RULES

1. All participants are expected to maintain a spirit of fair play and sportsmanship.
2. Use of any unfair means will lead to disqualification.
3. Instructions provided by organizers must be strictly followed.

Rounds

Round 1: Pen and Paper Round

Description: Teams solve questions focused on mental ability, problem-solving, logic and quick thinking.

Objective: Solve as many questions accurately as possible within the allotted time.

Round 2: Surprise Round

Description: A mystery round revealed during the event, involving clues and decoding information.

Objective: Successfully complete all tasks to qualify for the final round

Round 3: Grand Finale - Treasure Hunt (Surprise Round)

Description: The top teams compete in a thrilling treasure hunt. Specifics remain a surprise until the round begins ensuring an exciting conclusion to the event.

Objective: The first team to solve all clues and reach the final treasure wins

IMAGINATION STATION

" At ImaginAltion Station, teams embark on an adventure where technology meets storytelling. They solve clues to uncover the genre and use AI to create stories. With each round, the challenge intensifies as teams showcase the power of imagination and creativity in an AI-powered world."

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 100

■ GENERAL RULES

1. Each team shall consist of two members; individual participation is not allowed.
2. Only one laptop per team is required.
3. All work must be original and created using provided AI tools.
4. Plagiarism or external materials are strictly prohibited.
5. Misconduct or malpractice will result in immediate disqualification.
6. The event coordinators' decisions are final and binding.
7. Detailed rules for each round will be provided at the start of each respective round.

Rounds

Round1: Genre Quest

Phase1: Genre IQ - A brain teaser round designed to test problem-solving skills.

Phase2: Genre Grid - Solve a crossword puzzle related to genres and story elements, uncovering a hidden genre to use in the next round.

Round2: Tale Tailors

Phase1: StoryCraft - Create a short story based on the given genre, using AI tools to brainstorm ideas and develop characters.

Phase2: The Final Revelation - A surprise twist challenges participants to elevate their creativity and AI skills.

ELECTRIFEST

" Unleash Your Entrepreneurial Spirit! Are you an Electrical Engineering student with a bright idea?

Do you dream of turning your passion into a successful startup? Look no further! ElectriFest is the perfect platform to showcase your innovative ideas.

Competition Overview

ElectriFest is an entrepreneurship idea presentation competition exclusively for Electrical Engineering students. The competition aims to encourage and support students in developing innovative solutions, products, or services in the field of electrical engineering.

Compete, Create, and Innovate

- Submit your innovative idea and present it to a panel of experts

- Receive mentorship and guidance from experienced professionals to refine your idea

Don't Miss This Opportunity
Participate in ElectriFest and:

- Develop your entrepreneurial skills and confidence
- Take the first step towards turning your idea into a successful startup

So, what are you waiting for? Form your teams, brainstorm your ideas, and get ready to spark innovation! Register now and be a part of ElectriFest!"

TEAM SIZE - 3

MIN. TEAM SIZE - 2

■ GENERAL RULES

Eligibility

1. The competition is open to students currently enrolled in the Electrical Engineering department.
2. Teams must consist of max 3 members.

3. Each team member must be a student in good standing.

Idea Submission

1. Teams must submit a brief write-up (150 words) and a 5-minutes presentation.

2. Submissions must be original and created by the team members.

3. No copyrighted or proprietary materials can be used without permission.

Judging Criteria

1. Innovation (30%): Novelty, uniqueness, and potential impact.

2. Technical Feasibility (25%): Technical soundness and potential for implementation.

3. Market Potential (20%): Market demand, competition, and potential for growth.

4. Presentation (25%): Clarity, enthusiasm, and effectiveness of the presentation.

Presentation Day

1. Teams will have 5 minutes to present their idea.

2. Presentations must be in English.

3. Visual aids (e.g., slides, prototypes) are allowed.

4. Teams must answer questions from the judges within the allotted time.

General Rules

1. Teams must register by the specified deadline.

2. Teams must attend all scheduled events (mentorship sessions, presentation day, etc.).

3. Teams must not disclose confidential information about their idea to anyone except the organizers and judges.

Sannidhi Tubachi - 9141023898

Gururajendrayya Hiremath - 9972377725

MODEL MAKING

" The theme for the model making is "Electrical Power Distribution Network". Designing a electrical infrastructure is an engaging way to visualize how a power transmission will takes place in real life, transforming high-voltage power into a usable format and distributing it safely and efficiently. Participants should prepare the prototype, which includes Layout, Label Components, Safety and Control Equipment etc. Also students can use their own innovative ideas to prepare the model."

TEAM SIZE - 4

MIN. TEAM SIZE - 4

■ GENERAL RULES

1. Four Members per group.
2. Model should be submitted before the deadline.
3. Model should be a prototype and must be according to the given theme.

For more details:

Archana Gumaste - 9353971400

Omran - 63666 90655

LASER MAZER

" In this event, teams will be given a Laser beam torch and tasked with guiding the laser beam to a designated destination within the arena in the shortest possible time. The arena will have obstacles that teams must navigate around using mirrors to reflect the laser beam to its final destination. The team that reaches the destination the fastest will qualify for the next round. In the final round, the two teams with the fastest times will be declared the winners."

TEAM SIZE - 3

MIN. TEAM SIZE - 3

MAX. REGISTRATION - 30 TEAMS

■ GENERAL RULES

1. Team Composition: Team must consist of 3 members.
Laser Beam Torch Bearer – The person responsible for holding and positioning the laser beam torch.
Path Creator – The person responsible for positioning mirrors to create the best possible path for the laser beam.
Strategist – The person responsible for planning the optimal route and coordinating the team's actions.
2. Equipment: Laser beam torch, Mirrors, Arena with obstacles (revealed on the spot).
3. Gameplay: The timer starts as soon as the laser beam torch is switched on.
The laser beam torch must be placed at the designated start location, which will be marked in the arena. Teams cannot start from any random location.
Teams must work together to reflect the laser beam using mirrors to reach the destination as quickly as possible.

The first team to reach the destination, or the team that finishes in the shortest time, will qualify for the next round. If no team reaches the destination within 3 minutes, the team will be automatically disqualified.

4. Time Limit: The time limit for each round is 3 minutes. If the team does not reach the destination in this time, they will be disqualified.

Teams can finish before the time limit.

The two fastest teams in the final round will be declared the winners.

5. Penalties: Moving, bending, or altering the arena's obstacles in any way will result in disqualification.

Maximum the threshold of 5 mirrors can be used and a time penalty will be given per every additional mirror used.

Time reduction bonus will be given for a usage lesser mirror per mirror. Damaging the arena will also result in disqualification of the team.

6. Note: Teams are responsible for directing the laser beam effectively within the given time. Failure to manage the laser beam within the given constraints is part of the team's challenge.

IGNITE

" This is an idea-pitching competition that invites teams to present groundbreaking solutions to real world challenges. Part of the Avalanche technical fest, this event encourages participants to think creatively and showcase their technical insights. In a two round format, teams will pitch and defend their ideas, focusing on originality, feasibility, and impact, with the goal of earning the title of the most innovative solution."

TEAM SIZE - 4

MIN. TEAM SIZE - 4

MAX. REGISTRATION - 20 TEAMS

■ GENERAL RULES

1. Team size: Teams must consist of 4 to 6 members.
2. Presentation Time: Each team will have 5-10 minutes to present their idea, followed by a 3-5 minute Q&A session with the judges.
3. Time Limit: Teams are encouraged to keep their presentations concise to maximize impact within the time limit.
4. Pitch Content: Teams must introduce the problem they are addressing, propose their solution, and explain its feasibility and potential impact. Presentations may include slides, videos, prototypes, or other visuals to help illustrate the idea. Ideas presented must be original and not previously showcased in other competitions.
5. Evaluation Criteria: Judging will be based on originality, feasibility, innovation, clarity, and presentation quality.

6. Submission Requirements: Teams may be required to submit a brief write-up or presentation slides 1- 2 days before the event.

Any additional materials (e.g., videos or prototypes) should be submitted in advance for approval, if applicable.

7. Code of Conduct: Participants are expected to conduct themselves professionally and respectfully towards other teams and judges.

Any form of plagiarism, copying of existing ideas, or failure to credit sources will result in immediate disqualification.

8. Technology and Resources: A projector and presentation setup will be provided. Teams are responsible for testing any additional equipment they bring in advance.

Teams should bring their own laptops and materials for the pitch.

9. Confidentiality: All ideas presented at IGNITE will be considered public knowledge. Event organizers and judges will not be responsible for maintaining confidentiality.

URBAN PULSE

" In this event, participants will propose innovative IoT solutions to make cities smarter, safer, and more efficient. Teams will brainstorm and present their ideas on how connected devices can tackle real-world urban challenges."

TEAM SIZE - 4

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 30 TEAMS

■ GENERAL RULES

1. Teams of 2-4 members.
2. Each team selects or is assigned a specific urban challenge to address.
3. Teams must propose a solution that uses IoT technology in a smart city context.
4. Presentations should include problem identification, proposed solution, potential benefits, and a brief technical description.
5. Judge's decision will be final.

Nameet Mirajkar - 7204968033

Gayatri Kamat - 8147415844

MOBILE MARVELS

" In this event, participants will design a mobile app that aims to inspire or solve a real-world problem. Using any app-building software, teams will build an app prototype and pitch their ideas to judges."

TEAM SIZE - 4

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 20 TEAMS

■ GENERAL RULES

1. Teams of 2-4 members.
2. Participants must develop the app within the allotted time using MIT App Inventor or any similar tool.
3. Apps must align with the given theme and demonstrate basic functionality.
4. Teams should present their app prototype and explain its intended impact, key features, and usability.
5. Judge's Decision will be final.

ICARUS (GLIDER MAKING)

" Event Overview: participants will have a limited time and resources to design, build, and launch their own gliders on the spot. This is the chance to craft the perfect flight machine that balances creativity, engineering, and aerodynamics.

Objective: The goal is to create a glider that can achieve maximum distance, airtime. Participants will be judged based on design innovation, flight performance, and adherence to competition guidelines."

TEAM SIZE - 3

MIN. TEAM SIZE - 2

■ GENERAL RULES

1. Design Inspection Round

Evaluation Criteria:

- Stability of aircraft
- Quality of Construction

Aesthetic Features (appearance and design)

- Scoring: Points will be awarded based on the overall design, with a focus on stability, build quality and aesthetics.

2. Flight weighing round:

Objective:

- All aircraft will be weighted.
- Scoring: Aircraft with more weight will receive higher points.

3. Flying Round

- Evaluation Criteria

- Maximum distance covered by the aircraft.
 - Maximum air time (duration of flight).
 - Scoring: Points will be distributed based on both distance and air time.
4. Dimensional constraints:
- The aircraft's dimensions must not exceed 65cm in length and 45 cm in width.
5. It's not mandatory that the participants should use all the materials provided.
6. Participants are not allowed to use any outside material or pre-built parts.
7. Time limit: 2 hours to design, construct and test the glider. After building each team will have a chance to launch the glider and be judged on its performance.
8. Team size of minimum 2 members and maximum 3 members.
9. The basic drawing and cutting tools required should be brought by the participants.

NOTE - The rounds may increase based on maximum participation.

METIS (SIMPLEX TO COMPLEX)

" Create an intricate and complex chain reaction designed to release a balloon to fly in the air. The machine should use multiple steps involving a variety of creative mechanisms."

TEAM SIZE - 3

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 50

■ GENERAL RULES

1. Complexity: The machine must have at least 10 distinct, sequential steps leading to the final action.
2. Size and Space: The machine should fit within a 6 x 6-foot area (or adjust as needed based on available space).
3. Materials: Use household items and easily accessible materials (e.g., dominoes, balls, pulleys, ramps, levers).
4. Safety: Ensure all components are safe to use, and avoid any sharp, toxic, or potentially dangerous items.

Design and Construction Rules

1. Starting Mechanism: The machine should begin with a simple, single action (e.g., pushing a domino, releasing a ball, pulling a lever).
2. Steps: A minimum of 10 steps is required. Each step must trigger the next without manual intervention.
3. Unique Components: Include at least three different types of mechanisms, such as levers, inclined planes, pulleys, gears, or rolling objects.
4. Energy Transfer: The machine should exhibit various types of energy transfer, including kinetic, potential, and mechanical.

5. Balloon Activation: The final step should inflate the balloon using a mechanical process (e.g., a pump mechanism, pressure system) and release it to fly.
6. Reusable: The machine should be designed in a way that it can be reset for repeated demonstrations.

Performance Criteria

1. Timing: The entire sequence from start to finish should take between 30 seconds and 3 minutes.
2. Innovation: Creativity in the choice of mechanisms, materials, and sequence will be a factor in the assessment.

Assessment Criteria

1. Functionality: Does the machine successfully inflate and release the balloon?
2. Number of Steps: Does it have the required 10 or more steps?
3. Variety of Mechanisms: Are different types of mechanisms used effectively?
4. Design Creativity: Is the machine visually appealing and innovative in its design?
5. Safety and Stability: Are all parts secure and stable during operation?
6. Reset Ability: Can the machine be reset easily after use?

OLYMPIAD

" Get ready to unleash your inner math whiz and put your problem-solving skills to the test! The Math Olympiad Sprint is an adrenaline-packed competition that challenges the brightest minds to tackle complex mathematical conundrums, brain-teasers, and logical enigmas. In this thrilling 2-hour dash, teams of two will embark on a quest to conquer the world of numbers, patterns, and reasoning. With 15 puzzles to crack or as many as you can solve within the time limit, the pressure is on! Will you emerge victorious, crowned as the math maestros of your batch? Or will the clock tick down to defeat? Join the Math Olympiad Sprint to find out!"

TEAM SIZE - 2

MIN. TEAM SIZE - 2

MAX. REGISTRATION - 30 TEAMS

■ GENERAL RULES

1. Eligibility: 1st-year B.E., B.Arch and Bsc students.
2. Duration: 2 hours.
3. Question Format: Up to 15 questions or completion within time limit.
4. Team Size: 2 participants per team.
5. Further Instructions: Updates and guidelines shared in WhatsApp groups.

ENTANGLED EXPRESSION

" Welcome to Entangled Expressions: A Poster making Competition

Here's the deal: Teams of two will dive into the fascinating world of quantum mechanics by creating a poster on a chosen topic. The Coordinating Team will provide a list of topics for you to select from. Once you've chosen your topic, you and your teammate will have a set amount of time to create your poster right here on campus. After finishing, each team will get the chance to present their work to the judges, showcasing your insights, creativity, and quantum knowledge."

TEAM SIZE - 2

MIN. TEAM SIZE - 1

MAX. REGISTRATION - 100 TEAMS

■ GENERAL RULES

1. Maximum number of participants in a team is 2.
2. Materials will be provided by the coordinators (Paper, Black marker with usual Stationary), students can bring any extra materials that they need.
3. The Event will be Scheduled on Day 2.
4. Students will be allowed to use internet.
5. Print outs are not allowed.
6. Students need to complete the poster within the time limit. If not completed, then the incomplete poster will be evaluated and awarded points based on it.
7. Poster Presentation time limit is 5 minutes at max.
8. In case of any disputes, the decision of Judges or the Coordinators will be final.
